

Mobile app development

Our client required a mobile solution to complement its social design service of creating custom cases in an effort to drive additional customer engagement. The overall project aimed to provide users with access to the app with multiple features. The focus of the solution was to communicate the company's brand values to their valuable customers

Our Solution

Create an innovative value-added ecommerce platform to bring together all the products on one platform.

Design a mobile friendly UI that integrates functionalities with features.

Promising app with seamless execution, increasing revenue generation.

Business Challenges

Challenge of creating a perfect image browsing experience with pixel-perfect quality.

Unique product collection converted to an Ecommerce store.

Utilization of latest technologies.

Online shopping process made easy and delightful, by accessing countless products on the web store in just one click.

Access to thousands of products categorized under iPhone/ iPad Covers, Apple Watch Band, Android Cases and MacBook Sleeves.

The Result

Highly rated for its user experience and customizable approach. Increased brand value awareness among customers

Project completion from inception to finished product, meeting strict deadlines.

Great UI/UX with sleek design and easy navigation.

We Design exclusive artwork, fabulously depicted on the app in vibrant rich colors. Feature rich online store, integrated with Facebook and Instagram for photo sharing used in custom cases.
